

Oviya Suresh

PROFILE SUMMARY

An IT graduate seeking to excel as a Software Developer as a recent IT graduate, I’m thrilled to pursue a career in MERN stack development. My passion for designing exceptional web applications is backed by hands-on experience in Front-end Development, Quality Assurance, and .NET Development gained through internships. I bring a versatile skill set and eagerness to learn and adapt to new challenges.

EXPERIENCE

E-World Lanka, Trincomalee— *Frontend Developer (intern)*

September 2020- April 2021

- Developing frontend for websites using React and WordPress.
- Designing wireframes and UI using Figma.
- Website maintenance and documentation

Arya Labs, Polonnaruwa— *Junior .Net Developer (intern)*

October 2021- Jan 2022

- Developing POS applications using .NET Framework, Entity Framework 6.0,
- ADO.NET, MVC architecture and crystal report.
- Maintaining system reports and preparing documentations.

Oyslans, Trincomalee— *Quality Assurance(intern)*

January 2022- July 2022

- Maintaining MySQL databases, Data comparison and adding patch files and updates.
- Manual testing and maintaining the excel reports.

EDUCATION

University of Moratuwa, Colombo — BIT

Following the completion of a Bachelor of Information Technology, I will graduate in 2023.

PROJECTS

Online coding platform using MERN Stack

A platform that allows students to attempt the predefined questions under quiz categories by writing code in Java and C++ programming languages. **Used technologies are:** React JS, MUI for frontend, Node and Express JS for backend and MongoDB as database. To compile the code using JudgeO API.

Student Performance Analysis System

A web-based application that provides the passing rate of the students based on internal marks and predicts the level of passing. **Used Technologies are:** HTML5, CSS3 and JavaScript for frontend, PHP used for server-side scripting. MySQL as a database.

Payroll Management System

A web-based robust & user-friendly payroll management system using C# and SQL to record the employees’ details and salary. **Used technologies are:** C# used for backend programming language; SQL server used as database. WinForms are used for frontend and crystal reports are used for print reports.

Trincomalee, Sri Lanka

SKILLS

Java programming

SQL programming

C# programming

Git and GitHub

MERN Stack

Excel

ADDITIONAL

Certification in Python for Beginners at the University of Moratuwa.

Certification in Web Development at the University of Moratuwa.

Certification in Full Stack Development at the University of Moratuwa.

I regularly engaged in coding platforms HackerRank and UoM.

LANGUAGES

Tamil, English, Sinhala

MINI PROJECTS

Following mini project are developed using React Js

- Word counter
- Electric bill calculator
- BMI calculator
- Music player
- Quiz app
- Chat app
